

Electronic nameplate N-1

N-1

The housing is made of satin stainless steel

Dimension:

247 mm wide
48 mm high
58 mm deep

Weight:

700 g

With our nameplate N-1 you will be very flexible.

Now there is no more need for ordering or producing new nameplates in case of Jobsharing-Employments or staff turnover. Names can be created or added easily only by keypressing. Up to 4 names and text up to 16 signs can be stored and added. The names or text can also be altered afterwards.

The device has a USB-connection in order to change or store names through the Windows PC. The rechargeable batteries can also be charged through the USB-connection.

The high-quality LCD-Display has a special developed 38-Segment-Display with an outstanding sharp contrast. Excellent readability from almost all viewing angles and different lighting conditions. The battery operation enables a wireless handling with a capacity of appr. 1 year.

Included in the delivery:

Mini-USB cable & rechargeable battery (already charged)
On demand we programme your name list (free of charge)
