

# The Clock for Homes for the Elderly and Nursing Homes

**AMC 40Q**

**AMC 40Q3**

**AMC 40H**

- **A unique enrichment for homes and residences for senior citizens**
- **Large, highly visible analog clock (30 / 40 cm diameter clock face)**
- **Clear presentation of weekdays, date and / or part of the day**
- **Excellent readability under almost any lighting conditions**
- **Hence this clock is a welcome aid for senior citizens**

The AMC 40 clock series is particularly good for entrance and lounge areas in elderly and nursing homes. It was developed based on studies, which investigated the information needs and perceptual abilities of senior citizens.

The clock face is equipped with easily recognizable numbers. The closed black typeface is a completely new design especially developed for good readability and is only used in this design by the Valentin company.

A unique new feature is the full text representation of the part of the day which is adjustable on all models.

Laying cables for wireless antenna and power supply is not necessary. The clock is equipped with 1.5 V AA batteries and built-in radio receiver. The battery life is about 4 years.

- **Radio-controlled**
- **Wireless installation**
- **Large analog clock with clear display**
- **Date displayed as text**
- **Weekday displayed as text**
- **Part of the day displayed as text**
- **High contrast display**
- **Excellent readability even from wide viewing angles**
- **Symbols for radio signal reception and battery capacity**
- **Menu guidance for manual operation**
- **Long battery life of about 4 years**
