## C 20

# It's Time

The focus for the development of our calendar clock C-20 lies especially on a senior-friendly design and to consider suitability for the daily routine. All our products are developed by us and produced with the highest quality standards. We also attach importance to on-site production of our clocks and to buy vendor parts, where possible, also from the nearest environment. The short distances are eco-friendly and also support other companies in the surrounding area. It was a purposive management decision to manufacture only high-tech products in a top quality. Therefore each clock is made into detail by our employees in a manual method of production in order to stand out against mass production.
